## WORDS OF WISDOM

### FROM OUR FOUNDER, DR. MOHAN LAL GRERO

One day a professor entered the classroom and asked his students to prepare for a surprise test. They waited anxiously at their desks for the test to begin. The professor handed out the question paper with the text facing down as usual. Once he handed them all out, he asked his students to turn the page and begin. To everyone's surprise, there were no questions, just a black dot in the center of the page.

The professor seeing the expression on everyone's face, told them the following: "I want you to write what you see there." The confused students got started on the inexplicable task. At the end of the class, the professor took all the answer papers and started reading each one of them aloud in front of all the students. All of them with no exceptions described the black dot, trying to explain its position in the middle of the sheet.

After all had been read, the classroom was silent. The professor began to explain: "I am not going to grade you on this, and I just wanted to give you something to think about. No one wrote about the white part of the paper. Everyone focused on the black dot. The same happens in our lives. We have a white paper to observe and enjoy, but we always focus on the dark spots. Our life is a gift given to us by God with love and care. We always have reasons to celebrate, like the splendour of nature, good friends and family, and the miracles we experience."

"However, we insist on focusing only on the dark spots, the health issues that bother us, the lack of material things, and our weaknesses. The dark spots are very small compared to everything we have in our lives, but they are the ones that pollute our minds.

Take your eyes away from the black spots in your life. Learn to enjoy and treasure all of your blessings.
