

MESSAGE FROM OUR FOUNDER

Mr Mohan Lal Grero

I want you to find a little ant in your room, then put your hand in front of it to block its path and see what the ant will do. The ant will just change its direction and go around your hand. Now put your hand once again in front of the ant and it will change its direction again. Keep blocking the ant's path and it will keep changing its direction until you get bored!

The ant has a certain life goal and as soon as someone blocks its path, it changes its direction in a few seconds to find another route.

If you want to reach your goals in life you don't need to do much more than the ant does!

Have you ever seen an ant crying because someone blocked its path? Or have you seen three ants talking about how hard it is to reach a goal these days? Ants never do so, but we humans are professionals at crying over spilt milk and making a fuss whenever we fail to reach a goal.

If the route you've been taking isn't working, try a different route. If you lack the skills that you need to reach your goal, then develop those skills and try again. If you fail to reach a goal because of a mistake you made, then try once again, avoiding that mistake.

Do you know why few people reach their goals, while the majority doesn't? It's because the former group of people never bother wasting time telling others why they failed. They just keep going forward until they make it while the latter group wastes time in regrets and complaints. Remember, just do as the ant did and change your path whenever something blocks your way and keep going till you reach your goal.
