### Message from Mr. Mohan Lal Grero Founder

Sometimes the child-like spirit takes a hold of me and I wonder what it would be like to be a soaring bird. Apart from the care-free characteristic that birds are associated with, there are several important lessons we can learn from them that can build our character. Today I'm reminded of the eagle. There's just something about them. We can't help but be in awe of their stance, their flight and their behaviour - everything about them is aweinspiring and exciting.

Eagles have sharp vision. Their eyes are designed for long distance and clarity. They can spot something 50 miles away. Just imagine the possibilities with such vision. There have been many kinds of leaders but all of them have had one thing in common and that is vision. Your vision must be big and focused so that it will guide you and your team through obstacles and trying times, helping you to be successful.

Eagles are tenacious. When a storm comes, other birds fly away in fright but the eagle uses the wind current to climb to greater heights to literally rise above the storm. There are many challenges in the life of a leader but they do not shy away from them. Instead, they face them in order to rise above.

Eagles wait patiently in the air for the next opportunity to find their prey. They can climb up to 10,000 feet but can come back down swiftly to the ground. Likewise, great leaders are problem solvers. They do not grumble and complain but work patiently through challenges.

Eagles nurture their young. When the eaglets are very young the eagle gathers the eaglet on to her back, flies high and then swoops out from under it so that the eaglet falls until it learns what its wings are for. Other times she tears apart her nest so that the eaglet has nothing else to cling on to and then gently nudges him off a cliff. Similarly, bosses are not those who load over others but they guide and assist others to be better. Next time you find yourself leading others, be reminded of the eagle and be encouraged.
