Message from Mr. Mohan Lal Grero Founder

Each time the clock strikes at midnight, one day becomes history and a new one begins. we can't go back, and we can't jump ahead. If you are like me, you see every new day as

a chance to be all you can be. So how do we keep from missing out on abundant life today? We can forget the past and stop worrying about the future. Make sure your focus is fixed during the first ten minutes of each new day. Behavioural scientists have discovered that the first ten minutes are often the most important part of the day. Why? Because the first ten minutes can set the course of the entire day! When we start the day with a positive attitude, most of the time we will end up having a positive day. Joy and thankfulness don't just happen to us - we choose them! We may not feel happy or joyful, but when we act in happy, joyful ways, our choices will begin to respond to our feelings. Don't focus on what you haven't got - be grateful for what you have.

As you begin each day with a positive attitude, you will be sure to make the most of each and every new day.
